A

Abdominal aortic aneurysms

Matrix Metalloproteinase-2 Production and Its Binding to the Matrix Are Increased in Abdominal Aortic Aneurysms, 1625

Abdominal obesity

Abdominal Obesity, Impaired Nonesterified Fatty Acid Suppression, and Insulin-Mediated Glucose Disposal Are Early Metabolic Abnormalities in Families With Premature Myocardial Infarction, 1021

ACAT

Expression of ACAT-1 Protein in Human Atherosclerotic Lesions and Cultured Human Monocytes-Macrophages, 1568

Acetylcholine

Acute Endothelin-Receptor Inhibition Does Not Attenuate Acetylcholine-Induced Coronary Vasoconstriction in Experimental Hypercholesterolemia, 108

Actin

Alterations in Endothelial F-Actin Microfilaments in Rabbit Aorta in Hypercholesterolemia, 52

Activated protein C

Plasma Levels of Activated Protein C in Healthy Subjects and Patients With Previous Venous Thromboembolism: Relationships With Plasma Homocysteine Levels, 1371

Activating protein-1

Transcriptional Activation of Scavenger Receptor Expression in Human Smooth Muscle Cells Requires AP-1/c-Jun and C/EBP β : Both AP-1 Binding and JNK Activation Are Induced by Phorbol Esters and Oxidative Stress, 1440

Activator protein 1

LDL Induces Transcription Factor Activator Protein-1 in Human Endothelial Cells, 473

Acute-phase response

Endotoxin and Cytokines Increase Hepatic Sphingolipid Biosynthesis and Produce Lipoproteins Enriched in Ceramides and Sphingomyelin, 1257

Adductor hiatus

Early Atherosclerotic Lesions Spiraling Through the Femoral Artery, 1554

Adenoviral vector

Adventitial Expression of Recombinant eNOS Gene Restores NO Production in Arteries Without Endothelium, 1231

Adenovirus

Improvement of Relaxation in an Atherosclerotic Artery by Gene Transfer of Endothelial Nitric Oxide Synthase, 1752

Adhesion

Upregulation of VCAM-1 and ICAM-1 at Atherosclerosis-Prone Sites on the Endothelium in the ApoE-Deficient Mouse, 842

Adhesion molecules

Circulating Cell Adhesion Molecules Are Correlated With Ultrasound-Based Assessment of Carotid Atherosclerosis, 1765

Interleukin-1 β Induces Tissue- and Cell Type-Specific Expression of Adhesion Molecules In Vivo, 1292

Polymorphonuclear Leukocytes Induce PDGF Release From IL-1 β -Treated Endothelial Cells: Role of Adhesion Molecules and Serine Proteases, 1534

Adipocyte

The Adipocyte and Hemostatic Balance in Obesity: Studies of PAI-1, 1

Adipose tissue

The Adipocyte and Hemostatic Balance in Obesity: Studies of PAI-1, 1

The Adipocyte, Fatty Acid Trapping, and Atherogenesis, 147

β 3-Adrenergic receptor

Clinical Features Associated With the Homozygous Trp⁶⁴Arg Mutation of the β 3-Adrenergic Receptor: No Evidence for Its Association With Obesity in Japanese, 941

Age

Contrasting Patterns of Spontaneous Aortic Disease in Young and Old Rabbits, 300

Aggregation

Differential Involvement of Tyrosine and Serine/Threonine Kinases in Platelet Integrin $\alpha_{IIb}\beta_3$ Exposure, 404

Aging

Absence of Age-Related Increase in Central Arterial Stiffness in Physically Active Women, 127

Physical Activity Status and Adverse Age-Related Differences in Coagulation and Fibrinolytic Factors in Women, 362

AHA News

The Working Group Report on Science-Based Categories for Abstracts: Submitted to the Annual Scientific Sessions, 673

Alcohol

Alcohol Withdrawal-Induced Change in Lipoprotein(a): Association With the Growth Hormone/Insulin-like Growth Factor-I (IGF-I)/IGF-Binding Protein-1 (IGFBP-1) Axis, 650

Amino acid transport

Vitamin C Protects Human Arterial Smooth Muscle Cells Against Atherogenic Lipoproteins: Effects of Antioxidant Vitamins C and E on Oxidized LDL-Induced Adaptive Increases in Cystine Transport and Glutathione, 1662

Aminoguanidine

Influence of Glycation on LDL-Induced Generation of Fibrinolytic Regulators in Vascular Endothelial Cells, 1140

Angiography

IDL Composition and Angiographically Determined Progression of Atherosclerotic Lesions During Simvastatin Therapy, 577

Relation of Lipoprotein Subclasses as Measured by Proton Nuclear Magnetic Resonance Spectroscopy to Coronary Artery Disease, 1046

Sialic Acid Content of LDL in Coronary Artery Disease: No Evidence of Desialylation in Subjects With Coronary Stenosis and Increased Levels in Subjects With Extensive Atherosclerosis and Acute Myocardial Infarction: Relation Between Desialylation and In Vitro Peroxidation, 876

Angioplasty

Administration of Abciximab During Percutaneous Coronary Intervention Reduces Both Ex Vivo Platelet Thrombus Formation and Fibrin Deposition: Implications for a Potential Anticoagulant Effect of Abciximab, 1342

Angiotensin I-Converting Enzyme Genotype Influences Arterial Response to Injury in Normotensive Rats, 235

Arterial Remodeling at the Reference Site After Angioplasty in the Atherosclerotic Rabbit Model, 47

Lipoprotein(a) Level Does Not Predict Restenosis After Percutaneous Transluminal Coronary Angioplasty, 1281

Angiotensin

Angiotensin I-Converting Enzyme Genotype Influences Arterial Response to Injury in Normotensive Rats, 235

Angiotensin-converting enzyme

PAI-1 Plasma Levels in a General Population Without Clinical Evidence of Atherosclerosis: Relation to Environmental and Genetic Determinants, 562

Angiotensin-converting enzyme inhibitors

Combination of Fosinopril and Pravastatin Decreases Platelet Response to Thrombin Receptor Agonist in Monkeys, 1643

Angiotensin II

Increased Angiotensin II Type 1 Receptor Expression in Hypercholesterolemic Atherosclerosis in Rabbits, 1433

Natriuretic Factors and Nitric Oxide Suppress Plasminogen Activator Inhibitor-1 Expression in Vascular Smooth Muscle Cells: Role of cGMP in the Regulation of the Plasminogen System, 1771

Antibodies

Lysophosphatidylcholine Is Involved in the Antigenicity of Oxidized LDL, 626

Antibody titers

Antibody Titers Against Oxidized LDL Are Not Elevated in Patients With Familial Hypercholesterolemia, 1203

Anticoagulants

Pretreatment of Rabbits With Either Hirudin, Ancrod, or Warfarin Significantly Reduces the Immediate Uptake of Fibrinogen and Platelets by the Deendothelialized Aorta Wall After Balloon-Catheter Injury In Vivo, 816

Antioxidant vitamins

Effect of Thyroid Function on LDL Oxidation, 732

Antioxidants

Dietary Antioxidants Do Not Reduce Fatty Streak Formation in the C57BL/6 Mouse Atherosclerosis Model, 114

Dietary Antioxidants Inhibit Development of Fatty Streak Lesions in the LDL Receptor-Deficient Mouse, 1506

No Effect of Consumption of Green and Black Tea on Plasma Lipid and Antioxidant Levels and on LDL Oxidation in Smokers, 833

Uptake of Oxidized LDL by Macrophages Results in Partial Lysosomal Enzyme Inactivation and Relocation, 177

Antiplasmin

Lipoprotein(a) Level Does Not Predict Restenosis After Percutaneous Transluminal Coronary Angioplasty, 1281

Antiplatelet agents

In Vivo Efficacy of SM-20302, a GP IIb/IIIa Receptor Antagonist, Correlates With Ex Vivo Platelet Inhibition in Heparinized Blood but Not in Citrated Blood, 954

Recombinant von Willebrand Factor Fragment AR545C Inhibits Platelet Aggregation and Enhances Thrombolysis with rtPA in a Rabbit Thrombosis Model, 200

Antithrombotic agents

Recombinant von Willebrand Factor Fragment AR545C Inhibits Platelet Aggregation and Enhances Thrombolysis with rtPA in a Rabbit Thrombosis Model, 200

Antithrombotics

Inhibition of Repetitive Thrombus Formation in the Stenosed Canine Coronary Artery by Enoxaparin, But Not by Unfractionated Heparin, 908

Aorta

Alterations in Endothelial F-Actin Microfilaments in Rabbit Aorta in Hypercholesterolemia, 52

Fibronectin Expression and Aortic Wall Elastic Modulus in Spontaneously Hypertensive Rats, 1027

Increased Angiotensin II Type 1 Receptor Expression in Hypercholesterolemic Atherosclerosis in Rabbits, 1433

Intraluminal Pressure Is Essential for the Maintenance of Smooth Muscle Caldesmon and Filamin Content in Aortic Organ Culture, 922

Pretreatment of Rabbits With Either Hirudin, Ancrod, or Warfarin Significantly Reduces the Immediate Uptake of Fibrinogen and Platelets by the Deendothelialized Aorta Wall After Balloon-Catheter Injury In Vivo, 816

Relation of a Postmortem Renal Index of Hypertension to Atherosclerosis and Coronary Artery Size in Young Men and Women, 1108

Tibolone Prevents Atherosclerotic Lesion Formation in Cholesterol-Fed, Ovariectomized Rabbits, 1844

Aortic aneurysm

Conjugated Equine Estrogens Alone, but Not in Combination With Medroxyprogesterone Acetate, Inhibit Aortic Connective Tissue Remodeling After Plasma Lipid Lowering in Female Monkeys, 1164

Apo B mRNA editing

Distinct Promoters Induce APOBEC-1 Expression in Rat Liver and Intestine, 1079

ApoA-I

Haplotypes of the ApoA-I/C-III/A-IV Gene Cluster and Familial Combined Hyperlipidemia, 1810

ApoA-I Japanese

A Novel Homozygous Missense Mutation in the Apo A-I Gene With Apo A-I Deficiency, 389

ApoA-IV

Haplotypes of the ApoA-I/C-III/A-IV Gene Cluster and Familial Combined Hyperlipidemia, 1810

Apo(a) genotypes

Insulin and 2-Hour Glucose Levels Are Inversely Related to Lp(a) Concentrations Controlled for LPA Genotype, 1335

Apo(a) mRNA

Dominant Negative Effect of TGF- β 1 and TNF- α on Basal and IL-6-Induced Lipoprotein(a) and Apolipoprotein(a) mRNA Expression in Primary Monkey Hepatocyte Cultures, 984

ApoA1

Effect of the Novel Antiplatelet Agent Cilostazol on Plasma Lipoproteins in Patients With Intermittent Claudication, 1942

APOBEC-1

Distinct Promoters Induce APOBEC-1 Expression in Rat Liver and Intestine, 1079

Low Expression of the Apolipoprotein B mRNA-Editing Transgene in Mice Reduces LDL Levels but Does Not Cause Liver Dysplasia or Tumors, 1013

ApoC-III

Haplotypes of the ApoA-I/C-III/A-IV Gene Cluster and Familial Combined Hyperlipidemia, 1810

ApoE

Differential Effects of Lovastatin on the Trafficking of Endogenous and Lipoprotein-Derived Cholesterol in Human Monocyte-Derived Macrophages, 1322

Influence of ApoE Content on Receptor Binding of Large, Buoyant LDL in Subjects With Different LDL Subclass Phenotypes, 466

ApoE-knockout mice

Expression of Interleukin-6 in Atherosclerotic Lesions of Male ApoE-Knockout Mice: Inhibition by 17 β -Estradiol, 1498

ApoE variants

Reversal of Hypercholesterolemia in Apolipoprotein E2 and Apolipoprotein E3-Leiden Transgenic Mice by Adenovirus-Mediated Gene Transfer of the VLDL Receptor, 7

Apolipoprotein A-I

Apolipoprotein A-I_{Zavalla} (Leu₁₅₉→Pro): HDL Cholesterol Deficiency in a Kindred Associated With Premature Coronary Artery Disease, 1242

Estradiol Stimulates Apolipoprotein A-I- but Not A-II-Containing Particle Synthesis and Secretion by Stimulating mRNA Transcription Rate in Hep G2 Cells, 999

Apolipoprotein A-IV

Genetic Variation at the ApoA-IV Gene Locus and Response to Diet in Familial Hypercholesterolemia, 1266

Apolipoprotein B

Apolipoprotein B and Coronary Artery Disease in Women: A Cross-sectional Study in Women Undergoing Their First Coronary Angiography, 1101

A Common Functional Polymorphism in the Promoter Region of the Microsomal Triglyceride Transfer Protein Gene Influences Plasma LDL Levels, 756

Dietary Fish Oils Modify the Assembly of VLDL and Expression of the LDL Receptor in Rabbit Liver, 1490

Effects of Atorvastatin on the Intracellular Stability and Secretion of Apolipoprotein B in HepG2 Cells, 783

Phenotype Interaction of *apobec-1* and *CETP*, *LDLR*, and *ApoE* Gene Expression in Mice: Role of ApoB mRNA Editing in Lipoprotein Phenotype Expression, 747

Apolipoprotein B-100

Sequences Within the Amino Terminus of ApoB100 Mediate Its Noncovalent Association With Apo(a), 1738

Apolipoprotein E

Enhanced Upregulation of the Fc γ Receptor IIIa (CD16a) During In Vitro Differentiation of ApoE4/4 Monocytes, 1424

Macrophage Phenotype in Mice Deficient in Both Macrophage-Colony-Stimulating Factor (Op) and Apolipoprotein E, 631

Phenotype Interaction of *apobec-1* and *CETP*, *LDLR*, and *ApoE* Gene Expression in Mice: Role of ApoB mRNA Editing in Lipoprotein Phenotype Expression, 747

Apolipoprotein J

Distribution and Synthesis of Apolipoprotein J in the Atherosclerotic Aorta, 665

Apolipoprotein polymorphisms

Charge Heterogeneity of LDL in Asymptomatic Hypercholesterolemic Men Is Related to Lipid Parameters and Variations in the ApoB and CIII Genes, 1780

Apolipoprotein variant

A Novel Homozygous Missense Mutation in the Apo A-I Gene With Apo A-I Deficiency, 389

Apolipoprotein(a)

- Apolipoprotein(a) Enhances Platelet Responses to the Thrombin Receptor-Activating Peptide SFLLRN, 1393
- Impact of Apo(a) Length Polymorphism and the Control of Plasma Lp(a) Concentrations: Evidence for a Threshold Effect, 1870

Endothelium

- Alterations in Endothelial F-Actin Microfilaments in Rabbit Aorta in Hypercholesterolemia, 52
- Biphasic Regulation of Transcription Factor Nuclear Factor- κ B Activity in Human Endothelial Cells by Lysophosphatidylcholine Through Protein Kinase C-Mediated Pathway, 568
- Herpesviruses in Atherosclerosis and Thrombosis: Etiologic Agents or Ubiquitous Bystanders? 339
- Increased Angiotensin II Type 1 Receptor Expression in Hypercholesterolemic Atherosclerosis in Rabbits, 1433
- Interleukin-1 β Induces Tissue- and Cell Type-Specific Expression of Adhesion Molecules In Vivo, 1292
- Laminar Shear Stress: Mechanisms by Which Endothelial Cells Transduce an Atheroprotective Force, 677
- Regulation of PDGF-B in Endothelial Cells Exposed to Cyclic Strain, 349
- Role of Polymorphonuclear Leukocytes in Collar-Induced Intimal Thickening in the Rabbit Carotid Artery, 915
- Vascular Endothelial Cell Regulation of Extracellular Matrix Collagen: Role of Nitric Oxide, 717
- von Willebrand Factor: A Marker of Endothelial Damage? 1359

Endothelium-derived factors

- Inhibition of NO Synthesis Induces Inflammatory Changes and Monocyte Chemoattractant Protein-1 Expression in Rat Hearts and Vessels, 1456

Environment

- Phenotypic Variation in Heterozygous Familial Hypercholesterolemia: A Comparison of Chinese Patients With the Same or Similar Mutations in the LDL Receptor Gene in China or Canada, 309

Enzymatic degradation

- Immunohistochemical Demonstration of Enzymatically Modified Human LDL and Its Colocalization With the Terminal Complement Complex in the Early Atherosclerotic Lesion, 369

Epidemiology

- Hyperhomocysteinemia Is Associated With an Increased Risk of Cardiovascular Disease, Especially in Non-Insulin-Dependent Diabetes Mellitus: A Population-Based Study, 133

Estradiol

- Estradiol Suppresses MCP-1 Expression In Vivo: Implications for Atherosclerosis, 1575
- Norethindrone Acetate Enhances the Antiatherogenic Effect of 17 β -Estradiol: A Secondary Prevention Study of Aortic Atherosclerosis in varietalized Cholesterol-Fed Rabbits, 902

17 β -Estradiol

- Effect of 17 β -Estradiol on Inhibition of Platelet Aggregation In Vitro Is Mediated by an Increase in NO Synthesis, 961

Estrogen

- Age-Related Deterioration in Arterial Structure and Function in Postmenopausal Women: Impact of Hormone Replacement Therapy, 1149
- Estradiol Stimulates Apolipoprotein A-I- but Not A-II-Containing Particle Synthesis and Secretion by Stimulating mRNA Transcription Rate in Hep G2 Cells, 999
- Estradiol Suppresses MCP-1 Expression In Vivo: Implications for Atherosclerosis, 1575
- Expression of Interleukin-6 in Atherosclerotic Lesions of Male ApoE-Knockout Mice: Inhibition by 17 β -Estradiol, 1498
- Hormone Replacement Therapy Improves Cardiovascular Risk by Lowering Plasma Viscosity in Postmenopausal Women, 1902

Exercise

- Absence of Age-Related Increase in Central Arterial Stiffness in Physically Active Women, 127

Exercise and Cardiovascular Disease: A New Perspective, 1181

Physical Activity Status and Adverse Age-Related Differences in Coagulation and Fibrinolytic Factors in Women, 362

Physical Exertion Induces Thrombin Formation and Fibrin Degradation in Patients With Peripheral Atherosclerosis, 244

Extracellular matrix

- Fibronectin and Collagen I Matrixes Promote Calcification of Vascular Cells In Vitro, Whereas Collagen IV Matrix Is Inhibitory, 1964
- Metalloproteinase Blockade by Local Overexpression of TIMP-1 Increases Elastin Accumulation in Rat Carotid Artery Intima, 803
- Quantification and Characterization of Human Endothelial Cell-Derived Tissue Factor Pathway Inhibitor-2, 40
- Vascular Endothelial Cell Regulation of Extracellular Matrix Collagen: Role of Nitric Oxide, 717

Extracellular superoxide dismutase

Plasma Extracellular Superoxide Dismutase Levels in an Australian Population With Coronary Artery Disease, 1915

Extracellular superoxide dismutase Arg213→Gly mutation

Plasma Extracellular Superoxide Dismutase Levels in an Australian Population With Coronary Artery Disease, 1915

F**F₂-isoprostanes**

The F₂-Isoprostane 8-Epiprostaglandin F_{2 α} Increases Platelet Adhesion and Reduces the Antiadhesive and Antiaggregatory Effects of NO, 1248

Factor analysis

Factors of the Metabolic Syndrome: Baseline Interrelationships in the First Follow-up Cohort of the HDDRISC Study (HDDRISC-1), 208

Factor Xa

Prolonged Activation of Prothrombin on the Vascular Wall After Arterial Injury, 250

Familial combined hyperlipidemia

- Differential Effect of Genistein on the Stimulation of Cholesterol Production by Basic Protein II in Normal and HyperapoB Fibroblasts, 57
- Evidence Against Linkage of Familial Combined Hyperlipidemia to the Apolipoprotein AI-CIII-AIV Gene Complex, 215
- Haplotypes of the ApoA-I/C-III/A-IV Gene Cluster and Familial Combined Hyperlipidemia, 1810
- Impaired Insulin-Stimulated Glucose Oxidation and Free Fatty Acid Suppression in Patients with Familial Combined Hyperlipidemia: A Precursor Defect for Dyslipidemia? 1548

Familial hypercholesterolemia

- Antibody Titers Against Oxidized LDL Are Not Elevated in Patients With Familial Hypercholesterolemia, 1203
- Association of Specific LDL Receptor Gene Mutations With Differential Plasma Lipoprotein Response to Simvastatin in Young French Canadians With Heterozygous Familial Hypercholesterolemia, 1007
- Clinical Criteria Versus DNA Diagnosis in Heterozygous Familial Hypercholesterolemia: Is Molecular Diagnosis Superior to Clinical Diagnosis? 331
- Genetic Variation at the ApoA-IV Gene Locus and Response to Diet in Familial Hypercholesterolemia, 1266
- Mutations in the Low-Density Lipoprotein Receptor Gene in Chinese Familial Hypercholesterolemia Patients, 1600
- Phenotypic Variation in Heterozygous Familial Hypercholesterolemia: A Comparison of Chinese Patients With the Same or Similar Mutations in the LDL Receptor Gene in China or Canada, 309

Fat-free mass

Serial Changes in Body Composition Throughout Adulthood and Their Relationships to Changes in Lipid and Lipoprotein Levels: The Fels Longitudinal Study, 1759

Fatty acid-binding protein

Postprandial Lipemic Response Is Modified by the Polymorphism at Codon 54 of the Fatty Acid-Binding Protein 2 Gene, 1606

Fatty acids

- The Adipocyte, Fatty Acid Trapping, and Atherogenesis, 147
- Unsaturated Fatty Acids Increase Plasminogen Activator Inhibitor-1 Expression in Endothelial Cells, 1679

Femoral artery

Early Atherosclerotic Lesions Spiraling Through the Femoral Artery, 1554

Fibrin D-dimer

Physical Activity Status and Adverse Age-Related Differences in Coagulation and Fibrinolytic Factors in Women, 362

Fibrinogen

Adsorption of Fibrinogen to Droplets of Liquid Hydrophobic Phases: Functionality of the Bound Protein and Biological Implications, 1948

β -Fibrinogen Gene Polymorphism ($C_{148} \rightarrow T$) Is Associated With Carotid Atherosclerosis: Results of the Austrian Stroke Prevention Study, 487

HDL₃-Mediated Inhibition of Thrombin-Induced Platelet Aggregation and Fibrinogen Binding Occurs via Decreased Production of Phosphoinositide-Derived Second Messengers 1,2-Diacylglycerol and Inositol 1,4,5-tris-Phosphate, 861

Physical Activity Status and Adverse Age-Related Differences in Coagulation and Fibrinolytic Factors in Women, 362

-455G/A Polymorphism of the β -Fibrinogen Gene Is Associated With the Progression of Coronary Atherosclerosis in Symptomatic Men: Proposed Role for an Acute-Phase Reaction Pattern of Fibrinogen, 265

Pretreatment of Rabbits With Either Hirudin, Ancrod, or Warfarin Significantly Reduces the Immediate Uptake of Fibrinogen and Platelets by the Deendothelialized Aorta Wall After Balloon-Catheter Injury In Vivo, 816

Relationship Between Plasma Viscosity and the Severity of Coronary Heart Disease, 870

Segregation Analysis of Plasminogen Activator Inhibitor-1 and Fibrinogen Levels in the NHLBI Family Heart Study, 1559

Fibrinogen binding

Differential Involvement of Tyrosine and Serine/Threonine Kinases in Platelet Integrin $\alpha_{IIb}\beta_3$ Exposure, 404

 β -Fibrinogen gene

Elevated Plasma Fibrinogen: Cause or Consequence of Cardiovascular Disease? 621

Fibrinolysis

Function of the Plasminogen/Plasmin and Matrix Metalloproteinase Systems After Vascular Injury in Mice With Targeted Inactivation of Fibrinolytic System Genes, 1035

Physical Exertion Induces Thrombin Formation and Fibrin Degradation in Patients With Peripheral Atherosclerosis, 244

Fibrinolytic activity

PAI-1 Plasma Levels in a General Population Without Clinical Evidence of Atherosclerosis: Relation to Environmental and Genetic Determinants, 562

Fibrinolytic system

Physical Activity Status and Adverse Age-Related Differences in Coagulation and Fibrinolytic Factors in Women, 362

Fibroblasts

Adventitial Expression of Recombinant eNOS Gene Restores NO Production in Arteries Without Endothelium, 1231

Influence of ApoE Content on Receptor Binding of Large, Buoyant LDL in Subjects With Different LDL Subclass Phenotypes, 466

Fibronectin

Fibronectin Expression and Aortic Wall Elastic Modulus in Spontaneously Hypertensive Rats, 1027

Fibronectin: Structure, Assembly, and Cardiovascular Implications, 1363

Filamin

Intraluminal Pressure Is Essential for the Maintenance of Smooth Muscle Caldesmon and Filamin Content in Aortic Organ Culture, 922

Fish oil

Hypocoagulant and Lipid-Lowering Effects of Dietary n-3 Polyunsaturated Fatty Acids With Unchanged Platelet Activation in Rats, 1480

Flavonoids

No Effect of Consumption of Green and Black Tea on Plasma Lipid and Antioxidant Levels and on LDL Oxidation in Smokers, 833

Flow

Flow-Mediated Regulation of G-Protein Expression in Cocultured Vascular Smooth Muscle and Endothelial Cells, 75

Foam cell macrophages

Sterol 27-Hydroxylase- and ApoAI/Phospholipid-Mediated Efflux of Cholesterol From Cholesterol-Laden Macrophages: Evidence for an Inverse Relation Between the Two Mechanisms, 554

Foam cells

Apolipoprotein B-48 or Its Apolipoprotein B-100 Equivalent Mediates the Binding of Triglyceride-Rich Lipoproteins to Their Unique Human Monocyte-Macrophage Receptor, 968

Effects of Intracellular Free Cholesterol Accumulation on Macrophage Viability: A Model for Foam Cell Death, 423

Extracellular Matrix Modulates Macrophage Functions Characteristic to Atheroma: Collagen Type I Enhances Acquisition of Resident Macrophage Traits by Human Peripheral Blood Monocytes In Vitro, 432

Hormone-Sensitive Lipase Overexpression Increases Cholesteryl Ester Hydrolysis in Macrophage Foam Cells, 991

In Vitro-Differentiated Embryonic Stem Cell Macrophages: A Model System for Studying Atherosclerosis-Associated Macrophage Functions, 1647

Folate

Vitamin Supplementation Reduces Blood Homocysteine Levels: A Controlled Trial in Patients With Venous Thrombosis and Healthy Volunteers, 356

Free IGF-I

Serum Total IGF-I, Free IGF-I, and IGFBP-1 Levels in an Elderly Population: Relation to Cardiovascular Risk Factors and Disease, 277

Free radicals

Interaction of Diabetes and Hypertension on Determinants of Endothelial Adhesiveness, 947

French Canadian

Association of Specific LDL Receptor Gene Mutations With Differential Plasma Lipoprotein Response to Simvastatin in Young French Canadians With Heterozygous Familial Hypercholesterolemia, 1007

G**G-proteins**

Flow-Mediated Regulation of G-Protein Expression in Cocultured Vascular Smooth Muscle and Endothelial Cells, 75

G Protein Signaling and Vein Graft Intimal Hyperplasia: Reduction of Intimal Hyperplasia in Vein Grafts by a $G_{\beta\gamma}$ Inhibitor Suggests a Major Role of G Protein Signaling in Lesion Development, 1275

G20210A prothrombin mutation

Clinical Studies and Thrombin Generation in Patients Homozygous or Heterozygous for the G20210A Mutation in the Prothrombin Gene, 1287

Gelatinase

Function of the Plasminogen/Plasmin and Matrix Metalloproteinase Systems After Vascular Injury in Mice With Targeted Inactivation of Fibrinolytic System Genes, 1035

Gene expression

Interleukin-1 β Induces Tissue- and Cell Type-Specific Expression of Adhesion Molecules In Vivo, 1292

Regulation of PDGF-B in Endothelial Cells Exposed to Cyclic Strain, 349

Gene regulation

A Common Functional Polymorphism in the Promoter Region of the Microsomal Triglyceride Transfer Protein Gene Influences Plasma LDL Levels, 756

Upregulation of Prostacyclin Synthesis-Related Gene Expression by Shear Stress in Vascular Endothelial Cells, 1922

Gene therapy

Adventitial Expression of Recombinant eNOS Gene Restores NO Production in Arteries Without Endothelium, 1231

Reversal of Hypercholesterolemia in Apolipoprotein E2 and Apolipoprotein E3-Leiden Transgenic Mice by Adenovirus-Mediated Gene Transfer of the VLDL Receptor, 7

Gene transfer

Adenovirus-Mediated Gene Transfer of Macrophage Colony Stimulating Factor to the Arterial Wall In Vivo, 1157

Adventitial Expression of Recombinant eNOS Gene Restores NO Production in Arteries Without Endothelium, 1231

- G Protein Signaling and Vein Graft Intimal Hyperplasia: Reduction of Intimal Hyperplasia in Vein Grafts by a $G_{\beta\gamma}$ Inhibitor Suggests a Major Role of G Protein Signaling in Lesion Development, 1275
- Improvement of Relaxation in an Atherosclerotic Artery by Gene Transfer of Endothelial Nitric Oxide Synthase, 1752
- Gene variant**
- PAI-1 Plasma Levels in a General Population Without Clinical Evidence of Atherosclerosis: Relation to Environmental and Genetic Determinants, 562
- Genes**
- Angiotensin I-Converting Enzyme Genotype Influences Arterial Response to Injury in Normotensive Rats, 235
- The PAI-1 Gene Locus 4G/5G Polymorphism Is Associated With a Family History of Coronary Artery Disease, 152
- Genetic variation**
- Genetic Variation at the ApoA-IV Gene Locus and Response to Diet in Familial Hypercholesterolemia, 1266
- Genetics**
- Angiotensin I-Converting Enzyme Genotype Influences Arterial Response to Injury in Normotensive Rats, 235
- Apolipoprotein A-I_{Zavalla} (Leu₁₅₉→Pro): HDL Cholesterol Deficiency in a Kindred Associated With Premature Coronary Artery Disease, 1242
- Elevated LDL Triglyceride Concentrations in Subjects Heterozygous for the Hepatic Lipase S267F Variant, 1212
- β -Fibrinogen Gene Polymorphism (C₁₄₈→T) Is Associated With Carotid Atherosclerosis: Results of the Austrian Stroke Prevention Study, 487
- Genetic Analysis of the Difference in Diet-Induced Atherosclerosis Between the Inbred Mouse Strains SM/J and NZB/BINJ, 615
- The Gln-Arg192 Polymorphism of Human Paraoxonase Gene Is Not Associated With Coronary Artery Disease in Italian Patients, 1611
- Metabolic Determinants Are Much More Important Than Genetic Polymorphisms in Determining the PAI-1 Activity and Antigen Plasma Concentrations: A Family Study With Part of the Stanislas Cohort, 84
- Methylenetetrahydrofolate Reductase Gene Polymorphism and Ischemic Stroke in Japanese, 1465
- Two Major Loci Control Variation in β -Lipoprotein Cholesterol and Response to Dietary Fat and Cholesterol in Baboons, 1061
- 455G/A Polymorphism of the β -Fibrinogen Gene Is Associated With the Progression of Coronary Atherosclerosis in Symptomatic Men: Proposed Role for an Acute-Phase Reaction Pattern of Fibrinogen, 265
- Genotype**
- Very-Low-Density Lipoprotein Response Element in the Promoter Region of the Human Plasminogen Activator Inhibitor-1 Gene Implicated in the Impaired Fibrinolysis of Hypertriglyceridemia, 20
- Geometry**
- Localizing Role of Hemodynamics in Atherosclerosis in Several Human Vertebrobasilar Junction Geometries, 708
- Glucose**
- Interaction of Diabetes and Hypertension on Determinants of Endothelial Adhesiveness, 947
- Glucose oxidation**
- Impaired Insulin-Stimulated Glucose Oxidation and Free Fatty Acid Suppression in Patients with Familial Combined Hyperlipidemia: A Precursor Defect for Dyslipidemia? 1548
- Glucose tolerance**
- Insulin and 2-Hour Glucose Levels Are Inversely Related to Lp(a) Concentrations Controlled for LPA Genotype, 1335
- Glycated LDL**
- Influence of Glycation on LDL-Induced Generation of Fibrinolytic Regulators in Vascular Endothelial Cells, 1140
- Glycoprotein IIb-IIIa**
- Priming of Platelet $\alpha_{IIb}\beta_3$ by Oxidants Is Associated With Tyrosine Phosphorylation of β_3 , 1698
- Glycosaminoglycans**
- Age-Related Changes in Populations of Aortic Glycosaminoglycans: Species With Low Affinity for Plasma Low-Density Lipoproteins, and Not Species With High Affinity, Are Preferentially Affected, 604
- Role of Macrophage Glycosaminoglycans in the Cellular Catabolism of Oxidized LDL by Macrophages, 542
- Golgi**
- Dietary Fish Oils Modify the Assembly of VLDL and Expression of the LDL Receptor in Rabbit Liver, 1490
- GP IIb/IIIa receptor antagonist**
- In Vivo Efficacy of SM-20302, a GP IIb/IIIa Receptor Antagonist, Correlates With Ex Vivo Platelet Inhibition in Heparinized Blood but Not in Citrated Blood, 954
- Granulocyte-colony stimulating factor**
- Role of Polymorphonuclear Leukocytes in Collar-Induced Intimal Thickening in the Rabbit Carotid Artery, 915
- H**
- HaeIII polymorphism**
- Elevated Plasma Fibrinogen: Cause or Consequence of Cardiovascular Disease? 621
- HDL**
- Common Variants in the Promoter of the Hepatic Lipase Gene Are Associated With Lower Levels of Hepatic Lipase Activity, Buoyant LDL, and Higher HDL₂ Cholesterol, 1723

- Hemostatic factors**
- Association of Dietary Fish and n-3 Fatty Acid Intake With Hemostatic Factors in the Coronary Artery Risk Development in Young Adults (CARDIA) Study, 1119

Heparin

Inhibition of Repetitive Thrombus Formation in the Stenosed Canine Coronary Artery by Enoxaparin, But Not by Unfractionated Heparin, 908

Hepatic expression

Distinct Promoters Induce APOBEC-1 Expression in Rat Liver and Intestine, 1079

Heritability

Segregation Analysis of Plasminogen Activator Inhibitor-1 and Fibrinogen Levels in the NHLBI Family Heart Study, 1559

Herpesviruses

Herpesviruses in Atherosclerosis and Thrombosis: Etiologic Agents or Ubiquitous Bystanders? 339

High density lipoproteins

Estradiol Stimulates Apolipoprotein A-I- but Not A-II-Containing Particle Synthesis and Secretion by Stimulating mRNA Transcription Rate in Hep G2 Cells, 999

HDL₃-Mediated Inhibition of Thrombin-Induced Platelet Aggregation and Fibrinogen Binding Occurs via Decreased Production of Phosphoinositide-Derived Second Messengers 1,2-Diacylglycerol and Inositol 1,4,5-tris-Phosphate, 861

High density LPL

Factors of the Metabolic Syndrome: Baseline Interrelationships in the First Follow-up Cohort of the HDDRISC Study (HDDRISC-1), 208

Histamine

Inhibition by Cholesterol Oxides of NO Release From Human Vascular Endothelial Cells, 1054

HMG-CoA reductase inhibitors

Effects of Atorvastatin on the Intracellular Stability and Secretion of Apolipoprotein B in HepG2 Cells, 783

Esterified Cholesterol Accumulation Induced by Aggregated LDL Uptake in Human Vascular Smooth Muscle Cells Is Reduced by HMG-CoA Reductase Inhibitors, 738

The HMG-CoA Reductase Inhibitor Atorvastatin Increases the Fractional Clearance Rate of Postprandial Triglyceride-Rich Lipoproteins in Miniature Pigs, 1906

Homocysteine

Hyperhomocysteinemia Is Associated With an Increased Risk of Cardiovascular Disease, Especially in Non-Insulin-Dependent Diabetes Mellitus: A Population-Based Study, 133

Influence of Biochemical Alterations on Arterial Stiffness in Patients With End-stage Renal Disease, 535

Methylenetetrahydrofolate Reductase Gene Polymorphism and Ischemic Stroke in Japanese, 1465

Opposite Effects of Plasma Homocysteine and the Methylenetetrahydrofolate Reductase C677T Mutation on Carotid Artery Geometry in Asymptomatic Adults, 1838

Plasma Levels of Activated Protein C in Healthy Subjects and Patients With Previous Venous Thromboembolism: Relationships With Plasma Homocysteine Levels, 1371

Serum Homocysteine and Risk of Coronary Heart Disease and Cerebrovascular Disease in Elderly Men: A 10-Year Follow-Up, 1895

Vitamin Supplementation Reduces Blood Homocysteine Levels: A Controlled Trial in Patients With Venous Thrombosis and Healthy Volunteers, 356

Hormone replacement therapy

Hormone Replacement Therapy Improves Cardiovascular Risk by Lowering Plasma Viscosity in Postmenopausal Women, 1902

Oral Contraceptives and Hormone Replacement Therapy Do Not Increase the Incidence of Arterial Thrombosis in a Nonhuman Primate Model, 92

Hormone-sensitive lipase

Hormone-Sensitive Lipase Overexpression Increases Cholesteryl Ester Hydrolysis in Macrophage Foam Cells, 991

Human

Human Vascular Smooth Muscle Cells Express Receptors for CC Chemokines, 397

Human aorta

Distribution and Synthesis of Apolipoprotein J in the Atherosclerotic Aorta, 665

Human endothelial cells

Inhibition by Cholesterol Oxides of NO Release From Human Vascular Endothelial Cells, 1054

Human macrophages

Differential Effects of Lovastatin on the Trafficking of Endogenous and Lipoprotein-Derived Cholesterol in Human Monocyte-Derived Macrophages, 1322

Human platelets

Differential Involvement of Tyrosine and Serine/Threonine Kinases in Platelet Integrin $\alpha_{IIb}\beta_3$ Exposure, 404

Human umbilical vein endothelial cells

LDL Induces Transcription Factor Activator Protein-1 in Human Endothelial Cells, 473

3-Hydroxy-3-methylglutaryl coenzyme A reductase inhibitors

Combination of Fosinopril and Pravastatin Decreases Platelet Response to Thrombin Receptor Agonist in Monkeys, 1643

27-Hydroxylase

Sterol 27-Hydroxylase- and ApoA1/Phospholipid-Mediated Efflux of Cholesterol From Cholesterol-Laden Macrophages: Evidence for an Inverse Relation Between the Two Mechanisms, 554

Hypercholesterolemia

Acute Endothelin-Receptor Inhibition Does Not Attenuate Acetylcholine-Induced Coronary Vasoconstriction in Experimental Hypercholesterolemia, 108

Alterations in Endothelial F-Actin Microfilaments in Rabbit Aorta in Hypercholesterolemia, 52

Charge Heterogeneity of LDL in Asymptomatic Hypercholesterolemic Men Is Related to Lipid Parameters and Variations in the ApoB and CIII Genes, 1780

Increased Angiotensin II Type 1 Receptor Expression in Hypercholesterolemic Atherosclerosis in Rabbits, 1433

Hypercoagulability

Plasma Levels of Activated Protein C in Healthy Subjects and Patients With Previous Venous Thromboembolism: Relationships With Plasma Homocysteine Levels, 1371

Hyperglycemia

Plasminogen Activator Inhibitor-1 Activity Is Independently Related to Both Insulin Sensitivity and Serum Triglycerides in 70-Year-Old Men, 258

Hyperhomocysteinemia

Carotid and Femoral Artery Wall Thickness and Stiffness in Patients at Risk for Cardiovascular Disease, With Special Emphasis on Hyperhomocysteinemia, 1958

Hypertlipidemia

Altered Myocardial Vasodilatation in Patients With Hypertriglyceridemia in Anatomically Normal Coronary Arteries, 294

Concentration of Endogenous tPA Antigen in Coronary Artery Disease: Relation to Thrombotic Events, Aspirin Treatment, Hyperlipidemia, and Multivessel Disease, 1634

Hypertension

Clinical Features Associated With the Homozygous Trp⁶⁴Arg Mutation of the β_3 -Adrenergic Receptor: No Evidence for Its Association With Obesity in Japanese, 941

Relation of a Postmortem Renal Index of Hypertension to Atherosclerosis and Coronary Artery Size in Young Men and Women, 1108

Hypertriglyceridemia

Altered Myocardial Vasodilatation in Patients With Hypertriglyceridemia in Anatomically Normal Coronary Arteries, 294

Apolipoprotein B-48 or Its Apolipoprotein B-100 Equivalent Mediates the Binding of Triglyceride-Rich Lipoproteins to Their Unique Human Monocyte-Macrophage Receptor, 968

RXR Agonists Activate PPAR α -Inducible Genes, Lower Triglycerides, and Raise HDL Levels In Vivo, 272

Hypertriglyceridemic VLDL

Genotype-Specific Transcriptional Regulation of PAI-1 Gene by Insulin, Hypertriglyceridemic VLDL, and Lp(a) in Transfected, Cultured Human Endothelial Cells, 1803

Hypoalphalipoproteinemia

Familial HDL Deficiency Characterized by Hypercatabolism of Mature ApoA-I but Not ProApoA-I, 655

Hypobetalipoproteinemia

Frequency of ApoB and ApoE Gene Mutations as Causes of Hypobetalipoproteinemia in the Framingham Offspring Population, 1745

I**I κ B- α**

NO Inhibits Cytokine-Induced iNOS Expression and NF- κ B Activation by Interfering With Phosphorylation and Degradation of I κ B- α , 1796

IDL

Composition and Angiographically Determined Progression of Atherosclerotic Lesions During Simvastatin Therapy, 577

IGFBP-1

Serum Total IGF-I, Free IGF-I, and IGFBP-1 Levels in an Elderly Population: Relation to Cardiovascular Risk Factors and Disease, 277

IL-1 β

NO Inhibits Cytokine-Induced iNOS Expression and NF- κ B Activation by Interfering With Phosphorylation and Degradation of I κ B- α , 1796

Ileal bile acid cotransporter

Inhibition of Ileal Na⁺/Bile Acid Cotransporter by S-8921 Reduces Serum Cholesterol and Prevents Atherosclerosis in Rabbits, 1304

Immune system

Immunization of LDL Receptor-Deficient Mice With Homologous Malondialdehyde-Modified and Native LDL Reduces Progression of Atherosclerosis by Mechanisms Other Than Induction of High Titers of Antibodies to Oxidative Neopeptides, 1972

Immunohistochemistry

Expression of ACAT-1 Protein in Human Atherosclerotic Lesions and Cultured Human Monocytes-Macrophages, 1568

Immunohistochemical Demonstration of Enzymatically Modified Human LDL and Its Colocalization With the Terminal Complement Complex in the Early Atherosclerotic Lesion, 369

In situ hybridization

Distribution and Synthesis of Apolipoprotein J in the Atherosclerotic Aorta, 665

Incidence

Plasma Viscosity and the Risk of Coronary Heart Disease: Results From the MONICA-Augsburg Cohort Study, 1984 to 1992, 768

Inducible nitric oxide synthase

Chronic Blockade of NO Synthase Activity Induces a Proinflammatory Phenotype in the Arterial Wall: Prevention by Angiotensin II Antagonism, 1408

Expression of Extracellular SOD and iNOS in Macrophages and Smooth Muscle Cells in Human and Rabbit Atherosclerotic Lesions: Colocalization With Epitopes Characteristic of Oxidized LDL and Peroxynitrite-Modified Proteins, 157

NO Inhibits Cytokine-Induced iNOS Expression and NF- κ B Activation by Interfering With Phosphorylation and Degradation of I κ B- α , 1796

Inflammation

C-Reactive Protein Frequently Colocalizes With the Terminal Complement Complex in the Intima of Early Atherosclerotic Lesions of Human Coronary Arteries, 1386

Circulating Cell Adhesion Molecules Are Correlated With Ultrasound-Based Assessment of Carotid Atherosclerosis, 1765

Ultrastructural Localization of Secretory Type II Phospholipase A₂ in Atherosclerotic and Nonatherosclerotic Regions of Human Arteries, 519

-455G/A Polymorphism of the β -Fibrinogen Gene is Associated With the Progression of Coronary Atherosclerosis in Symptomatic Men: Proposed Role for an Acute-Phase Reaction Pattern of Fibrinogen, 265

Inositol-1,4,5-trisphosphate

Effects of Superoxide Anions on Endothelial Ca²⁺ Signaling Pathways, 1470

Insulin

The Adipocyte and Hemostatic Balance in Obesity: Studies of PAI-1, 1

Factors of the Metabolic Syndrome: Baseline Interrelationships in the First Follow-up Cohort of the HDDRISC Study (HDDRISC-1), 208

Genotype-Specific Transcriptional Regulation of PAI-1 Gene by Insulin, Hypertriglyceridemic VLDL, and Lp(a) in Transfected, Cultured Human Endothelial Cells, 1803

Hyperinsulinemia and Cardiovascular Disease in Elderly Men: The Honolulu Heart Program, 450

Impaired Insulin-Stimulated Glucose Oxidation and Free Fatty Acid Suppression in Patients with Familial Combined Hyperlipidemia: A Precursor Defect for Dyslipidemia? 1548

Postprandial Lipemic Response Is Modified by the Polymorphism at Codon 54 of the Fatty Acid-Binding Protein 2 Gene, 1606

Insulin-like growth factor binding protein-1

Alcohol Withdrawal-Induced Change in Lipoprotein(a): Association With the Growth Hormone/Insulin-like Growth Factor-I (IGF-I)/IGF-Binding Protein-1 (IGFBP-1) Axis, 650

Insulin-like growth factor-1

Alcohol Withdrawal-Induced Change in Lipoprotein(a): Association With the Growth Hormone/Insulin-like Growth Factor-I (IGF-I)/IGF-Binding Protein-1 (IGFBP-1) Axis, 650

Insulin receptor substrate-1

Plasma Leptin Levels: Interaction of Obesity With a Common Variant of Insulin Receptor Substrate-1, 1686

Insulin resistance

Abdominal Obesity, Impaired Nonesterified Fatty Acid Suppression, and Insulin-Mediated Glucose Disposal Are Early Metabolic Abnormalities in Families With Premature Myocardial Infarction, 1021

Hyperleptinemia as a Component of a Metabolic Syndrome of Cardiovascular Risk, 928

Impaired Insulin-Stimulated Glucose Oxidation and Free Fatty Acid Suppression in Patients with Familial Combined Hyperlipidemia: A Precursor Defect for Dyslipidemia? 1548

Metabolic Determinants Are Much More Important Than Genetic Polymorphisms in Determining the PAI-1 Activity and Antigen Plasma Concentrations: A Family Study With Part of the Stanislas Cohort, 84

Plasma Leptin Levels: Interaction of Obesity With a Common Variant of Insulin Receptor Substrate-1, 1686

Relation Between Plasma Tumor Necrosis Factor- α and Insulin Sensitivity in Elderly Men With Non-Insulin-Dependent Diabetes Mellitus, 1199

Relationship Between Insulin Resistance and Partially Oxidized LDL Particles in Healthy, Nondiabetic Volunteers, 762

Insulin sensitivity

Plasminogen Activator Inhibitor-1 Activity Is Independently Related to Both Insulin Sensitivity and Serum Triglycerides in 70-Year-Old Men, 258

Visceral Fat Accumulation Is an Important Determinant of PAI-1 Levels in Young, Nonobese Men and Women: Modulation by Cross-Sex Hormone Administration, 1716

Integrin $\alpha_{\text{IIb}}\beta_3$

Differential Involvement of Tyrosine and Serine/Threonine Kinases in Platelet Integrin $\alpha_{\text{IIb}}\beta_3$ Exposure, 404

25b1-Integrin

Fibronectin Expression and Aortic Wall Elastic Modulus in Spontaneously Hypertensive Rats, 1027

Integrins

Fibronectin: Structure, Assembly, and Cardiovascular Implications, 1363

Tetraspanin CD9 Is Associated With Very Late-Acting Integrins in Human Vascular Smooth Muscle Cells and Modulates Collagen Matrix Reorganization, 1691

Vitronectin Expression and Interaction With Receptors in Smooth Muscle Cells From Human Atheromatous Plaque, 168

 β_3 Integrins

Effects of β_3 -Integrin Blockade (c7E3) on the Response to Angioplasty and Intra-Arterial Stenting in Atherosclerotic Nonhuman Primates, 1730

Intercellular adhesion molecule-1

An Animal Model to Study Local Oxidation of LDL and Its Biological Effects in the Arterial Wall, 884

Interferon- γ

Cytokines Stimulate GTP Cyclohydrolase I Gene Expression in Cultured Human Umbilical Vein Endothelial Cells, 27

Oxidized LDL Increases and Interferon- γ Decreases Expression of CD36 in Human Monocyte-Derived Macrophages, 1350

Interleukin-1 β

Cytokines Stimulate GTP Cyclohydrolase I Gene Expression in Cultured Human Umbilical Vein Endothelial Cells, 27

Endotoxin and Cytokines Increase Hepatic Sphingolipid Biosynthesis and Produce Lipoproteins Enriched in Ceramides and Sphingomyelin, 1257

Inhibition of Tumor Necrosis Factor- α - and Interleukin-1-Induced Endothelial E-Selectin Expression by Thiol-Modifying Agents, 1829

- Interleukin-1 β Induces Tissue- and Cell Type-Specific Expression of Adhesion Molecules In Vivo, 1292

Increased Degradation of Lipoprotein(a) in Atherosclerotic Compared With Nonlesioned Aortic Intima-Inner Media of Rabbits: In Vivo Evidence That Lipoprotein(a) May Contribute to Foam Cell Formation, 641
Sialic Acid Content of LDL in Coronary Artery Disease: No Evidence of Desialylation in Subjects With Coronary Stenosis and Increased Levels in Subjects With Extensive Atherosclerosis and Acute Myocardial Infarction: Relation Between Desialylation and In Vitro Peroxidation, 876

Low density lipoprotein receptor-related protein

Enhanced Upregulation of the Fcγ Receptor IIIa (CD16a) During In Vitro Differentiation of ApoE4/4 Monocytes, 1424

Low HDL

RXR Agonists Activate PPARα-Inducible Genes, Lower Triglycerides, and Raise HDL Levels In Vivo, 272

Low-molecular-weight heparin

Inhibition of Repetitive Thrombus Formation in the Stenosed Canine Coronary Artery by Enoxaparin, But Not by Unfractionated Heparin, 908

LOX-1

Ligand Specificity of LOX-1, a Novel Endothelial Receptor for Oxidized Low Density Lipoprotein, 1541

Lp(a)

Dominant Negative Effect of TGF-β1 and TNF-α on Basal and IL-6-Induced Lipoprotein(a) and Apolipoprotein(a) mRNA Expression in Primary Monkey Hepatocyte Cultures, 984

Insulin and 2-Hour Glucose Levels Are Inversely Related to Lp(a) Concentrations Controlled for LPA Genotype, 1335

Lp(a) particle assembly

Sequences Within the Amino Terminus of ApoB100 Mediate Its Noncovalent Association With Apo(a), 1738

Lymphocytes

Matrix Metalloproteinase-2 Production and Its Binding to the Matrix Are Increased in Abdominal Aortic Aneurysms, 1625

Lysophosphatidic acid

Fibronectin: Structure, Assembly, and Cardiovascular Implications, 1363

Lysophosphatidylcholine

Lysophosphatidylcholine Is Involved in the Antigenicity of Oxidized LDL, 626

Lysosomes

Uptake of Oxidized LDL by Macrophages Results in Partial Lysosomal Enzyme Inactivation and Relocation, 177

M**Macrophage chemotactic and activating factor**

Cyclic Stretch Upregulates Production of Interleukin-8 and Monocyte Chemotactic and Activating Factor/Monocyte Chemoattractant Protein-1 in Human Endothelial Cells, 894

Macrophage colony stimulating factor

Adenovirus-Mediated Gene Transfer of Macrophage Colony Stimulating Factor to the Arterial Wall In Vivo, 1157

Macrophage Phenotype in Mice Deficient in Both Macrophage-Colony-Stimulating Factor (Op) and Apolipoprotein E, 631

Macrophage foam cells

Inhibition of LPL Expression in Human Monocyte-Derived Macrophages Is Dependent on LDL Oxidation State: A Key Role for Lysophosphatidylcholine, 1172

Macrophages

Atherogenic Properties of Enzymatically Degraded LDL: Selective Induction of MCP-1 and Cytotoxic Effects on Human Macrophages, 1376

Cholesterol Metabolism and Efflux in Human THP-1 Macrophages, 1589

Chronic Blockade of NO Synthase Activity Induces a Proinflammatory Phenotype in the Arterial Wall: Prevention by Angiotensin II Antagonism, 1408

Effects of Intracellular Free Cholesterol Accumulation on Macrophage Viability: A Model for Foam Cell Death, 423

Expression of Extracellular SOD and iNOS in Macrophages and Smooth Muscle Cells in Human and Rabbit Atherosclerotic Lesions: Colocalization With Epitopes Characteristic of Oxidized LDL and Peroxynitrite-Modified Proteins, 157

HMG-CoA Reductase Inhibitors Reduce MMP-9 Secretion by Macrophages, 1671

In Vitro-Differentiated Embryonic Stem Cell Macrophages: A Model System for Studying Atherosclerosis-Associated Macrophage Functions, 1647

Increased Degradation of Lipoprotein(a) in Atherosclerotic Compared With Nonlesioned Aortic Intima-Inner Media of Rabbits: In Vivo Evidence That Lipoprotein(a) May Contribute to Foam Cell Formation, 641

Induction of Macrophage VEGF in Response to Oxidized LDL and VEGF Accumulation in Human Atherosclerotic Lesions, 1188

Inhibition of NO Synthesis Induces Inflammatory Changes and Monocyte Chemoattractant Protein-1 Expression in Rat Hearts and Vessels, 1456

Macrophage Phenotype in Mice Deficient in Both Macrophage-Colony-Stimulating Factor (Op) and Apolipoprotein E, 631

Matrix Metalloproteinase-2 Production and Its Binding to the Matrix Are Increased in Abdominal Aortic Aneurysms, 1625

Role of Macrophage Glycosaminoglycans in the Cellular Catabolism of Oxidized LDL by Macrophages, 542

Uptake of Oxidized LDL by Macrophages Results in Partial Lysosomal Enzyme Inactivation and Relocation, 177

Macrosialin

Minimally Oxidized Low-Density Lipoprotein Increases Expression of Scavenger Receptor A, CD36, and Macrosialin in Resident Mouse Peritoneal Macrophages, 794

MAPK

Shear Stress Activates p60src-Ras-MAPK Signaling Pathways in Vascular Endothelial Cells, 227

Marker protein

Intraluminal Pressure Is Essential for the Maintenance of Smooth Muscle Caldesmon and Filamin Content in Aortic Organ Culture, 922

Mast cell degranulation

Hypercholesterolemia Enhances Oxidant Production in Mesenteric Venules Exposed to Ischemia/Reperfusion, 1583

Mast cells

Activation of Matrix-Degrading Metalloproteinases by Mast Cell Proteases in Atherosclerotic Plaques, 1707

Matrix

Ultrastructural Localization of Secretory Type II Phospholipase A₂ in Atherosclerotic and Nonatherosclerotic Regions of Human Arteries, 519

Matrix Gla protein

Calcification of Human Vascular Cells In Vitro Is Correlated With High Levels of Matrix Gla Protein and Low Levels of Osteopontin Expression, 379

Warfarin Causes Rapid Calcification of the Elastic Lamellae in Rat Arteries and Heart Valves, 1400

Matrix metalloproteinases

Activation of Matrix-Degrading Metalloproteinases by Mast Cell Proteases in Atherosclerotic Plaques, 1707

Extracellular Matrix Modulates Macrophage Functions Characteristic to Atheroma: Collagen Type I Enhances Acquisition of Resident Macrophage Traits by Human Peripheral Blood Monocytes In Vitro, 432

Matrix Metalloproteinase-2 Production and Its Binding to the Matrix Are Increased in Abdominal Aortic Aneurysms, 1625

Mechanical stress

Influence of Oscillatory and Unidirectional Flow Environments on the Expression of Endothelin and Nitric Oxide Synthase in Cultured Endothelial Cells, 686

Mechanotransduction

Laminar Shear Stress: Mechanisms by Which Endothelial Cells Transduce an Atheroprotective Force, 677

Shear Stress Activates p60src-Ras-MAPK Signaling Pathways in Vascular Endothelial Cells, 227

Membrane fluidity

Effects of Superoxide Anions on Endothelial Ca²⁺ Signaling Pathways, 1470

Membrane potential

Effects of Superoxide Anions on Endothelial Ca²⁺ Signaling Pathways, 1470

Metabolic syndrome

Factors of the Metabolic Syndrome: Baseline Interrelationships in the First Follow-up Cohort of the HDDRISC Study (HDDRISC-1), 208

Metalloproteinases

HMG-CoA Reductase Inhibitors Reduce MMP-9 Secretion by Macrophages, 1671

Methylenetetrahydrofolate gene

Opposite Effects of Plasma Homocysteine and the Methylenetetrahydrofolate Reductase C677T Mutation on Carotid Artery Geometry in Asymptomatic Adults, 1838

Methylenetetrahydrofolate reductase

Methylenetetrahydrofolate Reductase Gene Polymorphism and Ischemic Stroke in Japanese, 1465

Mexican Americans

Insulin and 2-Hour Glucose Levels Are Inversely Related to Lp(a) Concentrations Controlled for LPA Genotype, 1335

Mice

Dietary Antioxidants Do Not Reduce Fatty Streak Formation in the C57BL/6 Mouse Atherosclerosis Model, 114

Photochemically Induced Endothelial Injury in the Mouse as a Screening Model for Inhibitors of Vascular Intimal Thickening, 1069

Microcirculation

Endogenous Nitric Oxide Protects Against Thromboembolism in Venules But Not in Arterioles, 139

Microvascular endothelium

Leukocyte-Endothelium Interaction During the Early Stages of Hypercholesterolemia in the Rabbit: Role of P-Selectin, ICAM-1, and VCAM-1, 1093

Microvilli

Upregulation of VCAM-1 and ICAM-1 at Atherosclerosis-Prone Sites on the Endothelium in the ApoE-Deficient Mouse, 842

Minimally oxidized low density lipoprotein

Minimally Oxidized Low-Density Lipoprotein Increases Expression of Scavenger Receptor A, CD36, and Macrosialin in Resident Mouse Peritoneal Macrophages, 794

Molecular genetics

Clinical Criteria Versus DNA Diagnosis in Heterozygous Familial Hypercholesterolemia: Is Molecular Diagnosis Superior to Clinical Diagnosis? 331

Monkey hepatocytes

Dominant Negative Effect of TGF- β 1 and TNF- α on Basal and IL-6-Induced Lipoprotein(a) and Apolipoprotein(a) mRNA Expression in Primary Monkey Hepatocyte Cultures, 984

Monocyte chemoattractant protein-1

Chemokine Receptor CCR2 Expression and Monocyte Chemoattractant Protein-1-Mediated Chemotaxis in Human Monocytes: A Regulatory Role for Plasma LDL, 1983

Cyclic Stretch Upregulates Production of Interleukin-8 and Monocyte Chemoattractant and Activating Factor/Monocyte Chemoattractant Protein-1 in Human Endothelial Cells, 894

Estradiol Suppresses MCP-1 Expression In Vivo: Implications for Atherosclerosis, 1575

IL-1 β -Induced Monocyte Chemoattractant Protein-1 Gene Expression in Endothelial Cells Is Blocked by Proteasome Inhibitors, 934

Inhibition of NO Synthesis Induces Inflammatory Changes and Monocyte Chemoattractant Protein-1 Expression in Rat Hearts and Vessels, 1456

Monocyte chemotactic protein 1

Atherogenic Properties of Enzymatically Degraded LDL: Selective Induction of MCP-1 and Cytotoxic Effects on Human Macrophages, 1376

Monocyte-derived macrophages

Oxidized LDL Increases and Interferon- γ Decreases Expression of CD36 in Human Monocyte-Derived Macrophages, 1350

Monocytes

Adenovirus-Mediated Gene Transfer of Macrophage Colony Stimulating Factor to the Arterial Wall In Vivo, 1157

Enhanced Upregulation of the Fc γ Receptor IIIa (CD16a) During In Vitro Differentiation of ApoE4/4 Monocytes, 1424

Expression of ACAT-1 Protein in Human Atherosclerotic Lesions and Cultured Human Monocytes-Macrophages, 1568

Soluble Cell Adhesion Molecules in Hypertriglyceridemia and Potential Significance on Monocyte Adhesion, 723

Upregulation of VCAM-1 and ICAM-1 at Atherosclerosis-Prone Sites on the Endothelium in the ApoE-Deficient Mouse, 842

Monounsaturated fat

Differences in the Metabolism of Postprandial Lipoproteins After a High-Monounsaturated-Fat Versus a High-Carbohydrate Diet in Patients With Type 1 Diabetes Mellitus, 773

Mouse peritoneal resident macrophages

Minimally Oxidized Low-Density Lipoprotein Increases Expression of Scavenger Receptor A, CD36, and Macrosialin in Resident Mouse Peritoneal Macrophages, 794

MRNA

Inhibition of LPL Expression in Human Monocyte-Derived Macrophages Is Dependent on LDL Oxidation State: A Key Role for Lysophosphatidylcholine, 1172

MTHFR

Vitamin Supplementation Reduces Blood Homocysteine Levels: A Controlled Trial in Patients With Venous Thrombosis and Healthy Volunteers, 356

Mucopolysaccharidosis

Role of Macrophage Glycosaminoglycans in the Cellular Catabolism of Oxidized LDL by Macrophages, 542

Mutation

Molecular Genetic Study of Finns With Hypoalphalipoproteinemia and Hyperalphalipoproteinemia: A Novel Gly²³⁰ Arg Mutation (LCAT_{Fin}) of Lecithin:Cholesterol Acyltransferase (LCAT) Accounts for 5% of Cases With Very Low Serum HDL Cholesterol Levels, 591

Myocardial infarction

Abdominal Obesity, Impaired Nonesterified Fatty Acid Suppression, and Insulin-Mediated Glucose Disposal Are Early Metabolic Abnormalities in Families With Premature Myocardial Infarction, 1021

The Gln-Arg192 Polymorphism of Human Paraoxonase Gene Is Not Associated With Coronary Artery Disease in Italian Patients, 1611

Metabolic Determinants Are Much More Important Than Genetic Polymorphisms in Determining the PAI-1 Activity and Antigen Plasma Concentrations: A Family Study With Part of the Stanislas Cohort, 84

Plasma Extracellular Superoxide Dismutase Levels in an Australian Population With Coronary Artery Disease, 1915

Relationship Between Plasma Viscosity and the Severity of Coronary Heart Disease, 870

Myocardial vasodilatation

Altered Myocardial Vasodilatation in Patients With Hypertriglyceridemia in Anatomically Normal Coronary Arteries, 294

N**N-3 Polyunsaturated fatty acids**

Hypocoagulant and Lipid-Lowering Effects of Dietary n-3 Polyunsaturated Fatty Acids With Unchanged Platelet Activation in Rats, 1480

NAT1

Low Expression of the Apolipoprotein B mRNA-Editing Transgene in Mice Reduces LDL Levels but Does Not Cause Liver Dysplasia or Tumors, 1013

Natriuretic factors

Natriuretic Factors and Nitric Oxide Suppress Plasminogen Activator Inhibitor-1 Expression in Vascular Smooth Muscle Cells: Role of cGMP in the Regulation of the Plasminogen System, 1771

Necrosis

Apoptosis in Restenosis Versus Stable-Angina Atherosclerosis: Implications for the Pathogenesis of Restenosis, 1132

Neointima

Function of the Plasminogen/Plasmin and Matrix Metalloproteinase Systems After Vascular Injury in Mice With Targeted Inactivation of Fibrinolytic System Genes, 1035

Role of Polymorphonuclear Leukocytes in Collar-Induced Intimal Thickening in the Rabbit Carotid Artery, 915

von Willebrand Factor Does Not Influence Atherogenesis in Arteries Subjected to Altered Shear Stress, 323

NETA

Norethindrone Acetate Enhances the Antiatherogenic Effect of 17 β -Estradiol: A Secondary Prevention Study of Aortic Atherosclerosis in Ovariectomized Cholesterol-Fed Rabbits, 902

Neutral sphingomyelinase

Sphingolipids in Atherosclerosis and Vascular Biology, 1523

Nitric oxide

Cytokines Stimulate GTP Cyclohydrolase I Gene Expression in Cultured Human Umbilical Vein Endothelial Cells, 27

Effect of 17 β -Estradiol on Inhibition of Platelet Aggregation In Vitro Is Mediated by an Increase in NO Synthesis, 961

Endogenous Nitric Oxide Protects Against Thromboembolism in Venules But Not in Arterioles, 139

- The F₂-Isoprostane 8-Epiprostaglandin F_{2α} Increases Platelet Adhesion and Reduces the Antiadhesive and Antiaggregatory Effects of NO, 1248

Development of Compartmental Models in Stable-Isotope Experiments: Application to Lipid Metabolism, 853

Statins

HMG-CoA Reductase Inhibitors Reduce MMP-9 Secretion by Macrophages, 1671

Stearic acid

Similar Effects of Diets Rich in Stearic Acid or *trans*-Fatty Acids on Platelet Function and Endothelial Prostacyclin Production in Humans, 316

Stents

Effects of β 3-Integrin Blockade (c7E3) on the Response to Angioplasty and Intra-Arterial Stenting in Atherosclerotic Nonhuman Primates, 1730

Stretch

Intraluminal Pressure Is Essential for the Maintenance of Smooth Muscle Caldesmon and Filamin Content in Aortic Organ Culture, 922

Stroke

Methylenetetrahydrofolate Reductase Gene Polymorphism and Ischemic Stroke in Japanese, 1465

Subclinical disease

Differences in Prevalence of and Risk Factors for Subclinical Vascular Disease Among Black and White Participants in the Cardiovascular Health Study, 283

Sulfhydryl group

Paraoxonase Active Site Required for Protection Against LDL Oxidation Involves Its Free Sulfhydryl Group and Is Different From That Required for Its Arylesterase/Paraoxonase Activities: Selective Action of Human Paraoxonase Allozymes Q and R, 1617

T**T cells**

Immunization of LDL Receptor-Deficient Mice With Homologous Malondialdehyde-Modified and Native LDL Reduces Progression of Atherosclerosis by Mechanisms Other Than Induction of High Titers of Antibodies to Oxidative Neopeptides, 1972

TATA-less promoter

Distinct Promoters Induce APOBEC-1 Expression in Rat Liver and Intestine, 1079

Tea

No Effect of Consumption of Green and Black Tea on Plasma Lipid and Antioxidant Levels and on LDL Oxidation in Smokers, 833

Tetrahydrobiopterin

Cytokines Stimulate GTP Cyclohydrolase I Gene Expression in Cultured Human Umbilical Vein Endothelial Cells, 27

Tetraspanins

Tetraspanin CD9 Is Associated With Very Late-Acting Integrins in Human Vascular Smooth Muscle Cells and Modulates Collagen Matrix Reorganization, 1691

TGF- β

The Adipocyte and Hemostatic Balance in Obesity: Studies of PAI-1, 1

Therapy

Cytokines and Cell Adhesion Molecules in Cerebral Ischemia: Experimental Bases and Therapeutic Perspectives, 503

Thrombin

Differential Expression of Functional Protease-Activated Receptor-2 (PAR-2) in Human Vascular Smooth Muscle Cells, 825

Hypocoagulant and Lipid-Lowering Effects of Dietary *n*-3 Polyunsaturated Fatty Acids With Unchanged Platelet Activation in Rats, 1480

Lipoprotein(a) Level Does Not Predict Restenosis After Percutaneous Transluminal Coronary Angioplasty, 1281

Plasma Lipoproteins Support Prothrombinase and Other Procoagulant Enzymatic Complexes, 458

Prolonged Activation of Prothrombin on the Vascular Wall After Arterial Injury, 250

Sol Sherry Lecture in Thrombosis: How Thrombin 'Talks' to Cells: Molecular Mechanisms and Roles In Vivo, 514

Thrombin receptor-activating peptide

Apolipoprotein(a) Enhances Platelet Responses to the Thrombin Receptor-Activating Peptide SFLLRN, 1393

Thromboembolism

Plasma Levels of Activated Protein C in Healthy Subjects and Patients With Previous Venous Thromboembolism: Relationships With Plasma Homocysteine Levels, 1371

Thromboembolism pathophysiology

Endogenous Nitric Oxide Protects Against Thromboembolism in Venules But Not in Arterioles, 139

 β -Thromboglobulin

Platelet GP IIIa P1^a and GP Ib Variable Number Tandem Repeat Polymorphisms and Markers of Platelet Activation in Acute Stroke, 1124

Thrombolysis

Recombinant von Willebrand Factor Fragment AR545C Inhibits Platelet Aggregation and Enhances Thrombolysis with rtPA in a Rabbit Thrombosis Model, 200

Thrombomodulin

Expression of Thrombomodulin in Atherosclerotic Lesions and Mitogenic Activity of Recombinant Thrombomodulin in Vascular Smooth Muscle Cells, 1861

Thrombosis

Administration of Abciximab During Percutaneous Coronary Intervention Reduces Both Ex Vivo Platelet Thrombus Formation and Fibrin Deposition: Implications for a Potential Anticoagulant Effect of Abciximab, 1342

Herpesviruses in Atherosclerosis and Thrombosis: Etiologic Agents or Ubiquitous Bystanders? 339

In Vivo Efficacy of SM-20302, a GP IIb/IIIa Receptor Antagonist, Correlates With Ex Vivo Platelet Inhibition in Heparinized Blood but Not in Citrated Blood, 954

Inhibition of Repetitive Thrombus Formation in the Stenosed Canine Coronary Artery by Enoxaparin, But Not by Unfractionated Heparin, 908

Prolonged Activation of Prothrombin on the Vascular Wall After Arterial Injury, 250

Thrombotic tendency

Elevated Plasma Fibrinogen: Cause or Consequence of Cardiovascular Disease? 621

Thrombus organization

Elevated Expression of Urokinase-like Plasminogen Activator and Plasminogen Activator Inhibitor Type 1 During the Vascular Remodeling Associated With Pulmonary Thromboembolism, 808

Thyroid hormone

Effect of Thyroid Function on LDL Oxidation, 732

TIMP-1

Metalloproteinase Blockade by Local Overexpression of TIMP-1 Increases Elastin Accumulation in Rat Carotid Artery Intima, 803

Tissue culture cells

Human Apolipoproteins A-I and A-II in Cell Cholesterol Efflux: Studies With Transgenic Mice, 1417

Tissue factor

Prolonged Activation of Prothrombin on the Vascular Wall After Arterial Injury, 250

Tissue factor pathway inhibitor-2

Quantification and Characterization of Human Endothelial Cell-Derived Tissue Factor Pathway Inhibitor-2, 40

Tissue plasminogen activator

Concentration of Endogenous tPA Antigen in Coronary Artery Disease: Relation to Thrombotic Events, Aspirin Treatment, Hyperlipidemia, and Multivessel Disease, 1634

Influence of Glycation on LDL-Induced Generation of Fibrinolytic Regulators in Vascular Endothelial Cells, 1140

TNF- α

The Adipocyte and Hemostatic Balance in Obesity: Studies of PAI-1, 1

 α -Tocopherol

Biphasic Regulation of Transcription Factor Nuclear Factor- κ B Activity in Human Endothelial Cells by Lysophosphatidylcholine Through Protein Kinase C-Mediated Pathway, 568

Vitamin C Protects Human Arterial Smooth Muscle Cells Against Atherogenic Lipoproteins: Effects of Antioxidant Vitamins C and E on Oxidized LDL-Induced Adaptive Increases in Cystine Transport and Glutathione, 1662

Toxicity

- Atherogenic Properties of Enzymatically Degraded LDL: Selective Induction of MCP-1 and Cytotoxic Effects on Human Macrophages, 1376

Tracer kinetics

- The HMG-CoA Reductase Inhibitor Atorvastatin Increases the Fractional Clearance Rate of Postprandial Triglyceride-Rich Lipoproteins in Miniature Pigs, 1906

Tranilast

- Photochemically Induced Endothelial Injury in the Mouse as a Screening Model for Inhibitors of Vascular Intimal Thickening, 1069

Trans fatty acids

- Dietary Monounsaturated Fatty Acids Promote Aortic Atherosclerosis in LDL Receptor-Null, Human ApoB100-Overexpressing Transgenic Mice, 1818
- Similar Effects of Diets Rich in Stearic Acid or *trans*-Fatty Acids on Platelet Function and Endothelial Prostacyclin Production in Humans, 316

Transfection

- Genotype-Specific Transcriptional Regulation of PAI-1 Gene by Insulin, Hypertriglyceridemic VLDL, and Lp(a) in Transfected, Cultured Human Endothelial Cells, 1803

Transforming growth factor- β_1

- Endothelial NO Synthase Is Increased in Regenerating Endothelium After Denuding Injury of the Rat Aorta, 1312

Transgenic mice

- Function of the Plasminogen/Plasmin and Matrix Metalloproteinase Systems After Vascular Injury in Mice With Targeted Inactivation of Fibrinolytic System Genes, 1035
- Upregulation of VCAM-1 and ICAM-1 at Atherosclerosis-Prone Sites on the Endothelium in the ApoE-Deficient Mouse, 842

Translocation

- Effects of Atorvastatin on the Intracellular Stability and Secretion of Apolipoprotein B in HepG2 Cells, 783

Transplantation

- Oxidized Low Density Lipoproteins in Patients With Transplant-Associated Coronary Artery Disease, 100

Triglyceride

- Cholesterol Metabolism and Efflux in Human THP-1 Macrophages, 1589

Triglyceride-rich lipoproteins

- The HMG-CoA Reductase Inhibitor Atorvastatin Increases the Fractional Clearance Rate of Postprandial Triglyceride-Rich Lipoproteins in Miniature Pigs, 1906

Triglycerides

- Association of Vitamin K-Dependent Coagulation Proteins and C4b Binding Protein With Triglyceride-Rich Lipoproteins of Human Plasma, 33
- A Common Functional Polymorphism in the Promoter Region of the Microsomal Triglyceride Transfer Protein Gene Influences Plasma LDL Levels, 756
- Common Variants in the Promoter of the Hepatic Lipase Gene Are Associated With Lower Levels of Hepatic Lipase Activity, Buoyant LDL, and Higher HDL₂ Cholesterol, 1723
- Effect of the Novel Antiplatelet Agent Cilostazol on Plasma Lipoproteins in Patients With Intermittent Claudication, 1942
- Plasminogen Activator Inhibitor-1 Activity Is Independently Related to Both Insulin Sensitivity and Serum Triglycerides in 70-Year-Old Men, 258
- Postprandial Lipemic Response Is Modified by the Polymorphism at Codon 54 of the Fatty Acid-Binding Protein 2 Gene, 1606
- Relation Between Plasma Tumor Necrosis Factor- α and Insulin Sensitivity in Elderly Men With Non-Insulin-Dependent Diabetes Mellitus, 1199
- Soluble Cell Adhesion Molecules in Hypertriglyceridemia and Potential Significance on Monocyte Adhesion, 723
- Very-Low-Density Lipoprotein Response Element in the Promoter Region of the Human Plasminogen Activator Inhibitor-1 Gene Implicated in the Impaired Fibrinolysis of Hypertriglyceridemia, 20

Trypsin

- Differential Expression of Functional Protease-Activated Receptor-2 (PAR-2) in Human Vascular Smooth Muscle Cells, 825

Tryptase

- Activation of Matrix-Degrading Metalloproteinases by Mast Cell Proteases in Atherosclerotic Plaques, 1707

Tumor necrosis factor- α

- Cytokines Stimulate GTP Cyclohydrolase I Gene Expression in Cultured Human Umbilical Vein Endothelial Cells, 27
- Endotoxin and Cytokines Increase Hepatic Sphingolipid Biosynthesis and Produce Lipoproteins Enriched in Ceramides and Sphingomyelin, 1257
- Inhibition of Tumor Necrosis Factor- α - and Interleukin-1-Induced Endothelial E-Selectin Expression by Thiol-Modifying Agents, 1829
- Interleukin-1 β Induces Tissue- and Cell Type-Specific Expression of Adhesion Molecules In Vivo, 1292
- Relation Between Plasma Tumor Necrosis Factor- α and Insulin Sensitivity in Elderly Men With Non-Insulin-Dependent Diabetes Mellitus, 1199

Tumorigenesis

- Low Expression of the Apolipoprotein B mRNA-Editing Transgene in Mice Reduces LDL Levels but Does Not Cause Liver Dysplasia or Tumors, 1013

TUNEL

- Apoptosis in the Atherosclerotic Plaque: Quantitative and Qualitative Aspects, 1519

Type 1 diabetes mellitus

- Differences in the Metabolism of Postprandial Lipoproteins After a High-Monounsaturated-Fat Versus a High-Carbohydrate Diet in Patients With Type 1 Diabetes Mellitus, 773

Tyrosine kinase phosphorylation

- Differential Effect of Genistein on the Stimulation of Cholesterol Production by Basic Protein II in Normal and HyperapoB Fibroblasts, 57

Tyrosine kinases

- Effects of Superoxide Anions on Endothelial Ca²⁺ Signaling Pathways, 1470
- Priming of Platelet $\alpha_{IIb}\beta_3$ by Oxidants Is Associated With Tyrosine Phosphorylation of β_3 , 1698

U**Ultrasound**

- Circulating Cell Adhesion Molecules Are Correlated With Ultrasound-Based Assessment of Carotid Atherosclerosis, 1765
- Differences in Near-Wall Shear Rate in the Carotid Artery Within Subjects Are Associated With Different Intima-Media Thicknesses, 1877
- Sex and Topographic Differences in Associations Between Large-Artery Wall Thickness and Coronary Risk Profile in a French Working Cohort: The AXA Study, 584

Unstable angina

- Inhibition of Repetitive Thrombus Formation in the Stenosed Canine Coronary Artery by Enoxaparin, But Not by Unfractionated Heparin, 908

Upregulation

- Urokinase Receptor-dependent Upregulation of Smooth Muscle Cell Adhesion to Vitronectin by Urokinase, 1855

Urokinase

- Urokinase Receptor-dependent Upregulation of Smooth Muscle Cell Adhesion to Vitronectin by Urokinase, 1855

Urokinase receptor

- Urokinase Receptor-dependent Upregulation of Smooth Muscle Cell Adhesion to Vitronectin by Urokinase, 1855

Urokinase-type plasminogen activator

- Binding of Human Urokinase-Type Plasminogen Activator to Its Receptor: Residues Involved in Species Specificity and Binding, 693

Urokinase-type plasminogen activator receptor

- Binding of Human Urokinase-Type Plasminogen Activator to Its Receptor: Residues Involved in Species Specificity and Binding, 693

V**Vascular cell adhesion molecule-1**

- Factors Influencing the Ability of HDL to Inhibit Expression of Vascular Cell Adhesion Molecule-1 in Endothelial Cells, 1450

Vascular cells

- Phospholipase A₂ Type II Binds to Extracellular Matrix Biglycan: Modulation of Its Activity on LDL by Colocalization in Glycosaminoglycan Matrixes, 1934

Vascular disease

- Serum Homocysteine and Risk of Coronary Heart Disease and Cerebrovascular Disease in Elderly Men: A 10-Year Follow-Up, 1895

Vascular endothelial cells

- Flow-Mediated Regulation of G-Protein Expression in Cocultured Vascular Smooth Muscle and Endothelial Cells, 75

Vascular endothelial growth factor

- Induction of Macrophage VEGF in Response to Oxidized LDL and VEGF Accumulation in Human Atherosclerotic Lesions, 1188

Vascular endothelium

- Influence of Oscillatory and Unidirectional Flow Environments on the Expression of Endothelin and Nitric Oxide Synthase in Cultured Endothelial Cells, 686

Vascular injury

- Arterial Injury by Cholesterol Oxidation Products Causes Endothelial Dysfunction and Arterial Wall Cholesterol Accumulation, 1885

Vascular permeability

- Hypercholesterolemia Enhances Oxidant Production in Mesenteric Venules Exposed to Ischemia/Reperfusion, 1583

Vascular permeability factor

- Induction of Macrophage VEGF in Response to Oxidized LDL and VEGF Accumulation in Human Atherosclerotic Lesions, 1188

Vascular smooth muscle

- Calcification of Human Vascular Cells In Vitro Is Correlated With High Levels of Matrix Gla Protein and Low Levels of Osteopontin Expression, 379
Differential Expression of Functional Protease-Activated Receptor-2 (PAR-2) in Human Vascular Smooth Muscle Cells, 825
Flow-Mediated Regulation of G-Protein Expression in Cocultured Vascular Smooth Muscle and Endothelial Cells, 75
Smooth Muscle Cell Heterogeneity: Patterns of Gene Expression in Vascular Smooth Muscle Cells In Vitro and In Vivo, 333

Vascular smooth muscle cells

- Esterified Cholesterol Accumulation Induced by Aggregated LDL Uptake in Human Vascular Smooth Muscle Cells Is Reduced by HMG-CoA Reductase Inhibitors, 738
Herpesviruses in Atherosclerosis and Thrombosis: Etiologic Agents or Ubiquitous Bystanders? 339
Human Vascular Smooth Muscle Cells Express Receptors for CC Chemokines, 397
Natriuretic Factors and Nitric Oxide Suppress Plasminogen Activator Inhibitor-1 Expression in Vascular Smooth Muscle Cells: Role of cGMP in the Regulation of the Plasminogen System, 1771
Possible Involvement of m-Calpain in Vascular Smooth Muscle Cell Proliferation, 493

Vasorelaxation

- Improvement of Relaxation in an Atherosclerotic Artery by Gene Transfer of Endothelial Nitric Oxide Synthase, 1752

Vein grafts

- G Protein Signaling and Vein Graft Intimal Hyperplasia: Reduction of Intimal Hyperplasia in Vein Grafts by a G_{βγ} Inhibitor Suggests a Major Role of G Protein Signaling in Lesion Development, 1275

Venous thrombosis

- Vitamin Supplementation Reduces Blood Homocysteine Levels: A Controlled Trial in Patients With Venous Thrombosis and Healthy Volunteers, 356

Vessel wall injury

- Endogenous Nitric Oxide Protects Against Thromboembolism in Venules But Not in Arterioles, 139

Visceral fat accumulation

- Visceral Fat Accumulation Is an Important Determinant of PAI-1 Levels in Young, Nonobese Men and Women: Modulation by Cross-Sex Hormone Administration, 1716

Viscosity

- Plasma Viscosity and the Risk of Coronary Heart Disease: Results From the MONICA-Augsburg Cohort Study, 1984 to 1992, 768

Vitamin E

- Dietary Antioxidants Do Not Reduce Fatty Streak Formation in the C57BL/6 Mouse Atherosclerosis Model, 114
Increase of Vitamin E Content in LDL and Reduction of Atherosclerosis in Cholesterol-Fed Rabbits by a Water-Soluble Antioxidant-Rich Fraction of *Salvia miltiorrhiza*, 481

Vitamin K

- Warfarin Causes Rapid Calcification of the Elastic Lamellae in Rat Arteries and Heart Valves, 1400

Vitamin supplementation

- Vitamin Supplementation Reduces Blood Homocysteine Levels: A Controlled Trial in Patients With Venous Thrombosis and Healthy Volunteers, 356

Vitronectin

- Urokinase Receptor-dependent Upregulation of Smooth Muscle Cell Adhesion to Vitronectin by Urokinase, 1855
Vitronectin Expression and Interaction With Receptors in Smooth Muscle Cells From Human Atheromatous Plaque, 168

Vitronectin receptors

- Vitronectin Expression and Interaction With Receptors in Smooth Muscle Cells From Human Atheromatous Plaque, 168

β-VLDL

- Oxidized Cholesterol in the Diet Accelerates the Development of Aortic Atherosclerosis in Cholesterol-Fed Rabbits, 977
Unsaturated Fatty Acids Increase Plasminogen Activator Inhibitor-1 Expression in Endothelial Cells, 1679
Very-Low-Density Lipoprotein Response Element in the Promoter Region of the Human Plasminogen Activator Inhibitor-1 Gene Implicated in the Impaired Fibrinolysis of Hypertriglyceridemia, 20

VLDL receptor

- Reversal of Hypercholesterolemia in Apolipoprotein E2 and Apolipoprotein E3-Leiden Transgenic Mice by Adenovirus-Mediated Gene Transfer of the VLDL Receptor, 7

VLDL subspecies

- Preferential Cholesteryl Ester Acceptors Among Triglyceride-Rich Lipoproteins During Alimentary Lipemia in Normolipidemic Subjects, 65

von Willebrand disease

- von Willebrand Factor Does Not Influence Atherogenesis in Arteries Subjected to Altered Shear Stress, 323

von Willebrand factor

- Recombinant von Willebrand Factor Fragment AR545C Inhibits Platelet Aggregation and Enhances Thrombolysis with rtPA in a Rabbit Thrombosis Model, 200
von Willebrand Factor Does Not Influence Atherogenesis in Arteries Subjected to Altered Shear Stress, 323
von Willebrand Factor: A Marker of Endothelial Damage? 1359

W**Warfarin**

- Warfarin Causes Rapid Calcification of the Elastic Lamellae in Rat Arteries and Heart Valves, 1400

Women

- Apolipoprotein B and Coronary Artery Disease in Women: A Cross-sectional Study in Women Undergoing Their First Coronary Angiography, 1101

Z**Zymography**

- Metalloproteinase Blockade by Local Overexpression of TIMP-1 Increases Elastin Accumulation in Rat Carotid Artery Intima, 803
